Notification of hazards and accidents

The operator company must ensure immediate and coordinated notification of hazards and accidents to the authorities.

Go to the form

Whistleblowing

The ability to blow the whistle on illegal or unethical behaviour (“censurable conditions”) at work is an important right in Norwegian labour relations.

User Guide for completing the form can be found here.

Remember to save your work at regular intervals. The form does not save automatically.

Notification and reporting according to the management regulations(§ 29) *

Notification

Notifications shall be sent in the event of incidents or possible incidents such as situations which

- Have led to or
- Situations which under slightly altered circumstances could have led to

- A. Death
- B. Serious and acute injury
- C. Acute life-threatening illness
- D. Serious impairment or discontinuance of safety related functions or barriers, so that the integrity of the offshore or onshore facility is threatened
- E. Acute pollution

Select "Notification" or "Report", depending on the severity of the incident.

Report

Report shall be used for hazard and accident situations that are of a less serious or acute nature.

- B. Injury
- C. Illness
- D. Impairment or discontinuance of safety functions or other barriers, so that the integrity of the offshore or onshore facility is threatened
- E. Acute pollution

The form expires on 2021-06-08 09:40

Register incident

Notification

Report

Description of incident/near-miss *

Describe the incident in as much detail as possible

Write a detailed description of the event.

As far as possible, this description should include where on the facility the incident occurred, what happened and how. If one or more people have suffered personal injury, the number of injured must be included. The potential of the incident should also be described.

Has the incident caused acute pollution?

DSHA (used in the RNNP) *

- Notification
- Report

Description of incident/near-miss *

Describe the incident in as much detail as possible

Has the incident caused acute pollution?

GPS position in the event of acute pollution *

58°56'05.8205", 005°42'07.3644"

DSHA (used in the RNNP) *

DFU21D Fallende gjenstander - ANDRE OMRÅDER

Immediate measures implemented

Describe measures implemented (if any)

If the incident has led to acute pollution, the GPS position must be entered. A copy of the form will then be sent automatically to the Norwegian Coastal Administration, the Norwegian Environment Agency and the Norwegian Petroleum Directorate (NPD) on submission.

Select the right DSHA to categorise the incident.

Register incident

Notification

Report

Other Information *

Yes / No

- Emergency response organisation activated
- Personnel mustered
- Production/activity shutdown
- Drilling/well operations stopped
- The area is cordon off and evidence secured

Others you have notified of the incident *

- No others notified
- Police
- Norwegian Coastal Administration
- Civil Aviation Authority
- Directorate for Radiation Protection and Nuclear Safety
- Norwegian Maritime Authority
- Fire brigade (onshore plants only)
- Ambulance (onshore plants only)
- NOFO
- JRCC south or north

Check the relevant boxes when and if others have been notified of the incident.

In the event of a production shutdown/cessation of activity, a copy of the incident will be forwarded automatically to the NPD. The operator must consider whether this should also be reported to the NPD in accordance with section 79a of the petroleum regulations. Select "No" if there is no production on your facility.
